

Lyrica gives a new meaning to style and class for the mid-tower computers. Its solid main chassis is manufactured of 0.5mm Japanese Steel and it has a perfect finishing in all edges.

Lyrica's bright black front panel, black rubber front edge, hidden 5.35" bay cover, white power led and its fully black 2xUSB and HD Audio ports will give a high-end-stylish-looking to the computer that will make it look sophisticated no matter where you have it.

It includes one rear ultra-silent 9cm world awarded TACENS Aura PRO fan and side TAC 2.0 for an optimal but silent cooling, and it allows to install a front 12cm fan for extra system cooling specially directed to the HD and PCI cards area for fast HD and high-end VGA cards. Its high quality plastic feet ensures its stability and chassis anti-vibrations.

Lyrica is easy to manipulate with its black thumbscrews and it has space enough for all your components thanks to its 4x5.24" and 5x3.5" bays, ATX & micro-ATX mainboard support.

- Stylish front panel with bright black piano finishing, rubber black frame and white LED power lighting
- High-end cooling with rear 9cm Tacens Aura PRO Ultra-silent fan(12db), and TAC2.0 airduct on side panel
